

Number Lines

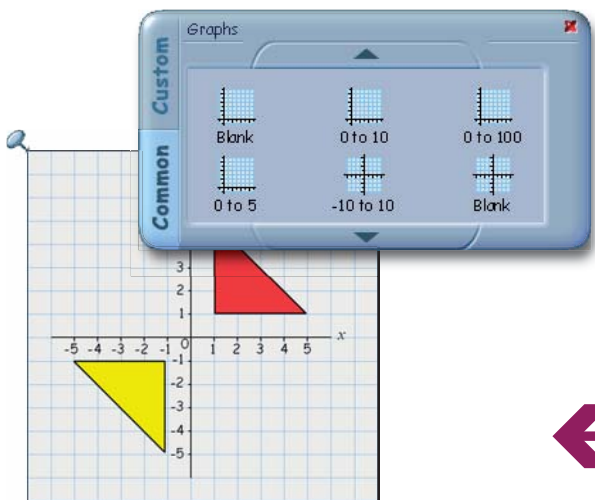

- Drag the number line you want onto the page.
- To move the number line on the page, drag it by the blue drawing pin.

TIP You can drag the individual numbers, for example the prime numbers, off the number line.

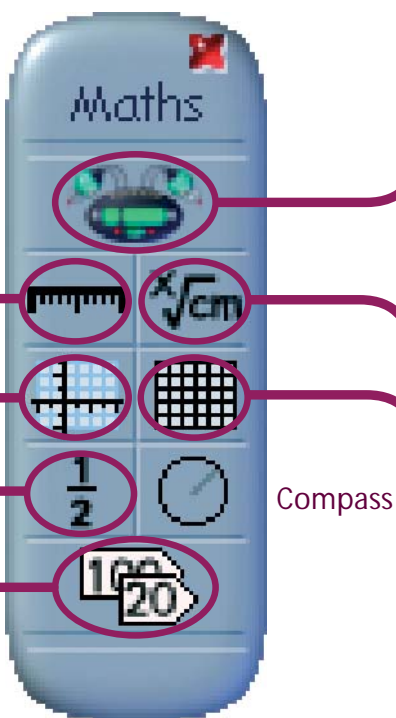

Graphs

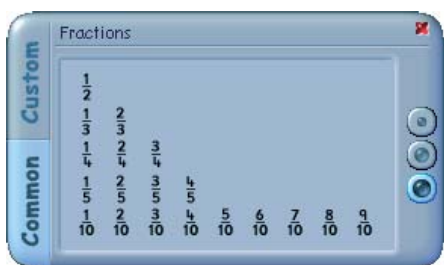

- Drag the graph you want onto the page, or click on the Custom tab to create a graph of your own.

TIP Use shapes on the graph from the Shapes palette on the Easiteach Toolbar.

Easiteach Maths Toolbar

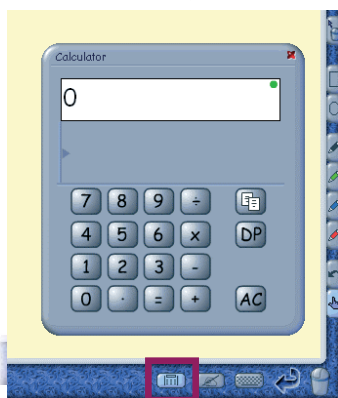

Fractions

- Drag the fraction you want onto the page.
- The size of the fraction can be changed using the size buttons.

Calculator

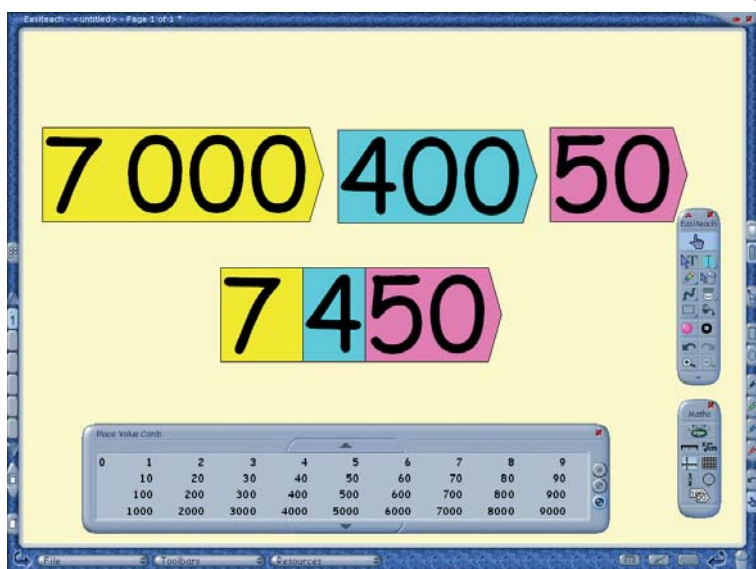

TIP Use the DP button to set the number of decimal places you wish to display.

Place Value Cards

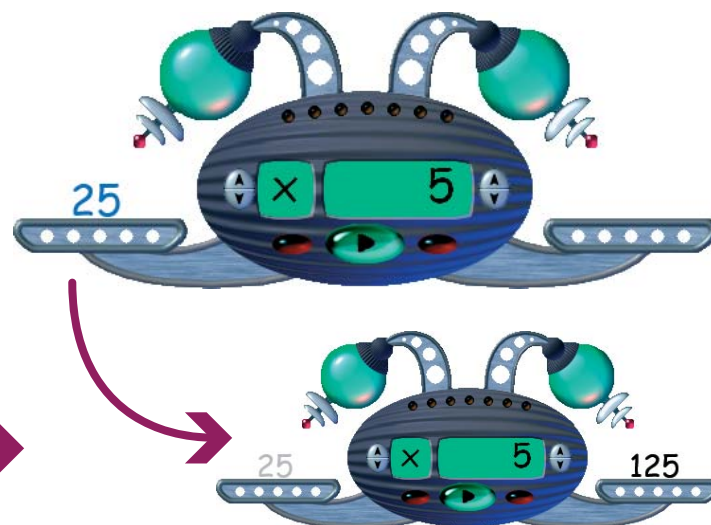

- Drag the number you want onto the page.
- To display numbers with decimal places, click the up arrow.
- To display larger numbers, click the down arrow.

TIP The colour of the card can be changed with the Fill tool.

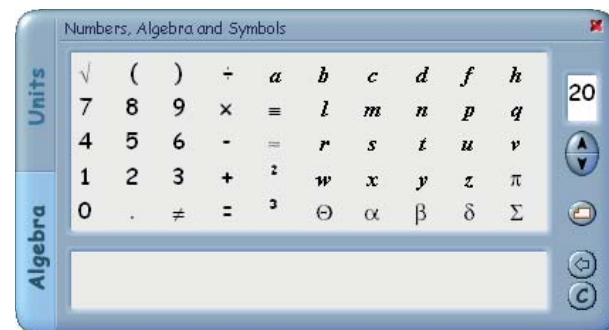

Function Machine

- Drag a number (or fraction) onto the platform of the Function Machine.
- Use the \uparrow \downarrow buttons to change the operator (\times $-$ $+$ \div) and to change the number (operand).
- Click \rightarrow to activate the Function Machine. The answer will appear on the right-hand side.

TIP The Function Machine makes a noise when you activate it, so make sure your speakers are switched on!

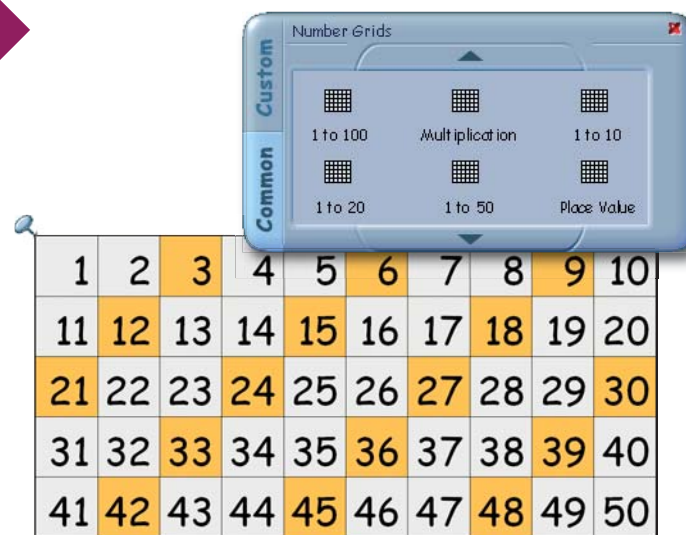

Numbers, Algebra and Symbols

- You can drag individual characters straight onto the page.
- Alternatively, click on characters to place them in the preview area and then drag whole expressions onto the page.

TIP Use the \rightarrow button to place characters onto a card background.

Number Grids

- Drag the number grid you want onto the page.
- You can move the number grid to a different position by dragging its blue drawing pin.

TIP You can drag individual numbers off the grid and colour cells with the Fill tool.
